| Personal Statement | A highly motivated IT student specializing in Mobile and Internet Technologies, I bring a robust, dual foundation in full-stack software development and modern UI/UX design principles, complemented by strong proficiency in data analysis. Experienced in translating requirements into tangible products through both academic and real-world projects, I thrive on hands-on application and have proven my capability by taking key leadership roles in complex capstone development, demonstrating proficiency in project coordination and decisive problem-solving. I am now eager to leverage my technical expertise and system analysis skills to contribute immediate, practical value within a dynamic internship setting. |
|---|---|
